Summary

I'm Javier Vargas, a passionate Software Developer with over a year of experience in web development. I'm proficient in HTML, CSS, JavaScript, React, Next.js, TypeScript, Tailwind CSS and have experience working with Python on freelance projects involving scraping and RPA. Currently, I'm applying my skills as a Next.js developer intern, building a dashboard with Tailwind CSS and FastAPI utilizing Docker containers.

Beyond technical skills, I bring strong soft skills to the table, including communication, teamwork, responsibility, and problem-solving. I'm a self-driven learner, starting my programming journey at 15 with YouTube videos. This dedication has fueled my continuous improvement – I actively learn and refine my skills every day.

I'm currently seeking new opportunities to leverage my skills and contribute to a collaborative team. If you're looking for a talented and motivated developer, feel free to connect or message me to schedule a chat!

Experience

Ruby School Library Project

Microverse

Sep 2023 - Sep 2023 (1 month)

Create a School Library Project, built with Ruby, best practices with Ruby.

React/Redux Developer

Microverse React/Redux Module

Nov 2022 - Dec 2022 (2 months)

I finished the React/Redux Module of Microverse, here are some highlighted projects using React/Redux:

- Books Store: a project making use of React components to render an App of Books, making use of Hooks, Event Handlers, etc...

Link: <https://books-store-javivy.netlify.app/>

- Space Travelers: A project to fetch an API with Redux, made with Pair Programming, Kanban Boards to divide the tasks, and built following a template.

Link: <https://space-travelers-javivy-mhamad.netlify.app/>

Javascript Developer

Microverse JavaScript Module

Sep 2022 - Oct 2022 (2 months)

I finished the second (JavaScript) module of Microverse where I built projects such as:

- ToDo List with Vanilla JavaScript

Link: <https://javivy.github.io/to-do-list/dist/>

- Pokemon Website Fetching API

Link: <https://javivy.github.io/js-capstone/dist/>

I learned testing with Jest, and most of the things about JavaScript ES6

HTML/CSS Developer

Microverse HTML/CSS Module

Aug 2022 - Sep 2022 (2 months)

Finished the First module (HTML/CSS) of the Microverse program, where I built some projects such as:

- Portfolio: Here you can see more projects made by me, with HTML/CSS, JavaScript, React, etc... This project (portfolio) was made throughout the first module, putting into practice the knowledge acquired about HTML and CSS.
